

Open Textbooks

A textbook becomes "open" when its copyright-holder grants usage rights to the public through an open license. This typically includes the right to access, download, reuse, revise, remix, and redistribute it at no cost. The repository's collection of open textbooks is open to the general public. This collection contains open textbooks for K-12, and undergraduate and graduate level textbooks.

Open Textbooks FAQ's

Who pays open textbook authors?

Open publishing models are still evolving, so author payment varies. Some are paid royalties on print sales, some receive grant support, and others choose to write on their own time and receive no financial compensation.

Are open textbooks high quality?

Many open textbooks are developed through traditional peer review or are vetted by experts in their field. As with any textbook, you are the final judge of whether an open textbook meets the needs of your course.

What do open textbooks look like?

Online print copies of open textbooks may look like traditional texts or be strictly digital and include embedded multimedia. The primary differences are that open textbooks are accessible at no cost and the hard copies are optional and affordably priced.

How do I adopt an open access textbook?

1. **Find the right textbook.** Search The Orange Grove repository. Use advanced search options to narrow results.
2. **Review the copyright permissions.** One of the [six Creative Commons licenses](#) is typically used to protect the rights of open textbook authors.
3. **Review and evaluate the textbook.** Review the textbook to ensure it matches your criteria and needs.
4. **Decide if you want to use it as is or edit it.** One of the benefits of open textbooks is the flexibility to modify and customize them for specific course designs as much or as little as you desire. If you want to make edits or append content, make sure the copyright licensing allows that.
5. **Decide if you wish to offer a bound version of the book.** There are many print-on-demand printers available to print individual copies of open textbooks or your institution's bookstore may offer print capabilities for your students.
6. **Distribute it to your students.** Select one or more formats to distribute to the course students (online, downloadable PDF, print-on-demand book via either a campus bookstore, print-on-demand printer, or the OGT+ "Buy It Now" button in the repository).
